Harness the power of SYNCEV charging point

The in-house technical team at SYNCEV have 12 years combined experience of EV charger installation having installed Podpoint, Rolec, Project EV, EO and other chargers. Indeed they became Rolec's first ever appointed regional installers.

Utilising their years of experience and calling upon their electrical engineering skills, their objective was to design the smallest, smartest most competitively priced EV charger. We believe this quest has been achieved, welcome to the SYNCEV Model number: EVCP-7KW-S-1PH:32A

Packed full of features

Customer Information

- 3 year warranty
- Smallest untethered charger
- Smart scheduled charging times
